

Premium Ice Melter

Melts Ice Faster

Pro-Link's Premium Ice Melter starts working on contact. Unlike many "salt and pepper" ice melters, each granule is coated with a melting enhancer that works individually for maximum performance.

- **Maximum freezing point of -27°F (-32°C)**
- **Works up to three times faster than ordinary ice melters**
- **Contains no dangerous chemicals**

Safe to Use

- Non-toxic – even safe for children and pets
- Can be handled safely with bare hands
- Will not harm trees, shrubs, lawns or other vegetation when used as directed
- Leaves no oily residue on carpets and floors
- Even safe for concrete when used as directed (not recommended for concrete less than one year old)
- Helps fight corrosion to exposed metal

Economical

- Uses less per square foot than most other ice melters on the market
- Green colored granules reduce the possibility of over-application
- Melting enhancer deters moisture and caking – creating a longer shelf life than most ice melters

To ease snow removal: apply this product at the beginning of the snow storm, if possible. Broadcast approximately ¼ oz. per square yard of area to be treated.

For ice removal: apply this product evenly over surface at the rate of approximately 8 oz. (1 cup) per square yard of area to be treated for each ¼ inch of ice.
